

IN THE CLAIMS

Please amend the claims as follows:

Claims 1-15 (Canceled).

Claim 16 (Currently Amended): An information storage medium configured to have data recorded thereon and data reproduced therefrom by an information recording/reproducing apparatus, said data including control information and audio/video data having a still picture video object, said medium comprising:

a control information area for storing still picture audio/video file information for managing the still picture video object, said still picture audio/video file information including group information of the still picture video object,

wherein said group information includes entry information of the still picture video object, said entry information including additional audio entry number information; and

a data area for recording the audio/video data is configured to include a sub-picture stream, wherein said entry information includes entry type information containing number information indicating whether the sub-picture stream is included,

said sub-picture stream is configured to include bitmap data, and  
the information recording/reproducing apparatus accesses the control information area to reproduce the still picture video object.

Claim 17 (Currently Amended): An information recording method for recording data on a medium configured to have data recorded thereon and data reproduced therefrom by an information recording/reproducing apparatus, said data including control information and audio/video data having a still picture video object, said medium comprising,

a control information area for storing still picture audio/video file information for managing the still picture video object, said still picture audio/video file information including group information of the still picture video object,

wherein said group information includes entry information of the still picture video object, said entry information including additional audio entry number information; ~~and~~

a data area for recording the audio/video data is configured to include a sub-picture stream, wherein said entry information includes entry type information containing number information indicating whether the sub-picture stream is included, and

said sub-picture stream is configured to include bitmap data,

said method comprising:

recording the audio/video data on the data area; and

storing the control information on the control information area.

Claim 18 (Currently Amended): An information reproducing method for reproducing data from a medium configured to have data recorded thereon and data reproduced therefrom by an information recording/reproducing apparatus, said data including control information and audio/video data having a still picture video object, said medium comprising,

a control information area for storing still picture audio/video file information for managing the still picture video object, said still picture audio/video file information including group information of the still picture video object,

wherein said group information includes entry information of the still picture video object, said entry information including additional audio entry number information; ~~and~~

a data area for recording the audio/video data is configured to include a sub-picture stream, wherein said entry information includes entry type information containing number information indicating whether the sub-picture stream is included, and

said sub-picture stream is configured to include bitmap data,

said method comprising:

reproducing the control information from the control information area; and

reproducing the audio/video data from the data area.

Claim 19 (Previously Presented): An information reproducing apparatus for reproducing data from the medium as defined in claim 16, said apparatus comprising:

a first reproducer configured to reproduce the control information from the control information area; and

a second reproducer configured to reproduce the audio/video data from the data area.
